# Altar Valley Berms: Distinguishing Breaches from Flanks

Figure Summary — Paper 2

Generated 2026-03-01 | Source: `figures/paper2/figure_registry_concise.txt`

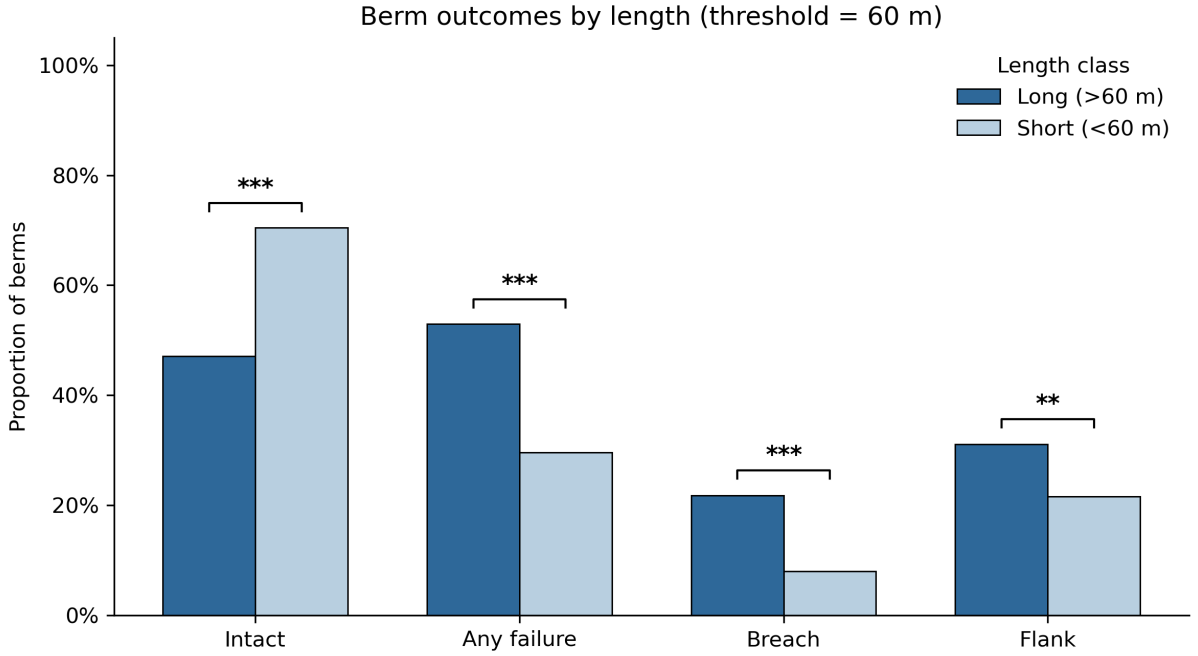

**Figure 2.** Grouped comparison of berm outcome proportions between Long and Short berm classes, with per-metric 2×2 contingency-table significance tests shown as bracket annotations. Outcome proportions differ by length class, and this figure serves as Paper 2 Figure 2 for the breach/flank-focused comparison.
